Acknowledgement

We would like to express our sincere gratitude to all those who supported and guided us throughout the development of our e-commerce project, **Laptop Pasal**.

We are deeply thankful to our lecturer, **Mr. Aavash Khadka**, for his valuable guidance, continuous encouragement, and insightful feedback, which played a crucial role in the successful completion of this project.

We would also like to extend our gratitude to **Madan Bhandari Memorial College** for providing the necessary resources and a supportive environment that enabled us to carry out this project effectively.

Lastly, we are grateful to our families and well-wishers for their constant support and encouragement throughout the process.

Abstract

This project, titled **Laptop Pasal**, is an e-commerce website designed to provide a platform for customers to purchase various types of laptops. The website is developed using **WordPress** and the **WooCommerce** plugin, hosted locally on **XAMPP**. Additionally, the website integrates the **Cash on Deluivery** for secure online transactions.

The primary objective of **Laptop Pasal** is to offer a convenient and user-friendly interface where customers can browse a variety of laptops, add them to their cart, and proceed to checkout with ease. The website features product categorization, a shopping cart, user registration and login, and order tracking capabilities.

This project showcases the integration of modern web technologies to build a functional and aesthetically pleasing e-commerce platform, with a focus on security, smooth user experience, and seamless payment processing.
